

PROFESSIONAL SUMMARY

B.Tech Computer Science student (AI/ML specialization, CGPA 8.5) with hands-on experience in **Python**, **software testing**, and **agentic AI**. Built and deployed production pipelines using LangChain and LLM tool-calling to generate clean, structured outputs. Possess a strong debugging mindset, comfortable navigating CLI tools, and experienced in writing automated unit tests and maintaining robust CI/CD workflows for reliable backend integrations.

EDUCATION

B.Tech – Computer Science and Engineering (AI/ML Specialization)	2023 – 2027
Sir Padampat Singhanian University, Udaipur, India	CGPA: 8.5 / 10.00
Higher Secondary Education (PCM)	2021 – 2023
Sri Chaitanya Junior College, Hyderabad	Percentage: 97.6%

WORK EXPERIENCE

AI/ML Engineer & Team Lead Infosys Springboard Virtual Internship	Aug 2025 – Oct 2025
<i>Project: AI-Powered Regulatory Compliance Checker Python, LangChain, Groq API, OpenAI GPT, Meta LLaMA</i>	
- Designed an agentic LLM pipeline that reads legal contracts and utilizes tool-calling to perform automated compliance analysis against GDPR/HIPAA via LangChain, returning clean, structured JSON outputs. - Applied a rigorous debugging mindset to trace and resolve API latency issues and hallucination edge-cases; engineered a fallback routing mechanism to ensure consistent and reliable pipeline execution. - Integrated automated stakeholder email alerts using CLI-executable Python scripts; led Agile stand-ups, conducted rigorous code reviews, and coordinated robust deployments across the team.	

PROJECTS

RAG & Agentic Tool-Calling Prototype	GitHub
<i>Python, LangChain, OpenAI API, Chroma Vector Database, FastAPI, CLI Tools</i>	
- Built an end-to-end agent-based prototype utilizing LLM tool-calling to dynamically route user queries for semantic search across multi-document corpora stored in a Chroma vector database. - Engineered system prompts and recursive text splitters to guarantee structured, verifiable outputs (JSON/Markdown) and drastically reduce hallucinations, keeping answers directly grounded in source data. - Deployed the backend via FastAPI, extensively using command-line (CLI) tools for log monitoring, environment configuration, and local endpoint testing to ensure high reliability.	
Real-Time Fraud Detection System with Automated Testing	GitHub
<i>Python, scikit-learn, XGBoost, Pytest, MLflow, Docker, GitHub Actions</i>	
- Built a complete machine learning pipeline for real-time fraud detection; implemented comprehensive software testing, writing robust unit tests using pytest to validate feature engineering logic. - Containerized the pipeline via Docker CLI and configured GitHub Actions CI/CD for automated test execution on every commit, quickly isolating and debugging integration errors. - Tracked experiments, hyperparameters, and model versions via MLflow; optimized recall with low false-positive rates by systematically troubleshooting class imbalance issues.	
My Digital Diary – AI Mood Tracker	GitHub
<i>PyTorch, HuggingFace Transformers, Streamlit, SQLite, Pandas</i>	
Built a full-stack wellness app with a custom fine-tuned BERTweet model, combined with a VADER rule-based sentiment override, generating highly accurate and structured emotion classifications from free-text.	

OPEN SOURCE & ACHIEVEMENTS

Open Source Contributor GirlScript Summer of Code & Social Winter of Code
Debugged and optimized Python-based repositories, utilizing Git/GitHub CLI tools for version control, issue tracking, and ensuring clean, structured code merges.
API Testing Certified Postman Student Program
Mastered API software testing by writing automated test scripts to validate RESTful endpoints, parse structured JSON payloads, and systematically debug backend request/response cycles.

TECHNICAL SKILLS

- Programming Languages:** Python, Java, C, C++, SQL
- Testing & Tools:** Software Testing, Unit Testing (Pytest), Debugging, CLI Tools, Docker, Git, GitHub Actions
- Agentic AI & NLP:** Tool/Function Calling, LangChain, OpenAI API, Groq API, Meta LLaMA, RAG Pipelines
- Data & ML:** PyTorch, scikit-learn, Fine-tuning, NumPy, Pandas, SQLite, FastAPI, MLflow

CERTIFICATIONS & LANGUAGES

Certifications:	Languages:
AI/ML Virtual Internship – Infosys Programming in Java – NPTEL, IIT Automation with N8N	- English - Telugu - Hindi - Kannada
